PROFESSIONAL SUMMARY

Software Engineering student at INTEC and freelance developer who builds and ships full-stack web and mobile applications, including a bilingual management platform used by a dental practice and an aesthetics center. Experienced with real-time features (WebSockets, voice/video calls), authentication, and relational and NoSQL databases. Seeking a full-stack or frontend role or internship.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Dart, C#, C++

Frontend and Mobile: React, Next.js, Flutter, HTML, CSS, Riverpod

Backend: FastAPI, Node.js, Express, REST APIs, Socket.IO

Databases and Cloud: PostgreSQL, MySQL, MongoDB, Firebase, Supabase, Appwrite

Tools: Git, GitHub, GitHub Actions, Docker, Linux, Bash, Prisma

Languages (spoken): Spanish: Native | English: Bilingual (C1)

EXPERIENCE

Freelance Full-Stack Developer

Aug 2026 - Present

G/O Workspace | React, TypeScript, Supabase, PostgreSQL, Vite

- Built a bilingual management platform in production use at a dental practice and an aesthetics center, covering appointments, patients, staff, services, finances, reports, and inventory.
- Implemented authentication and role-based workspace access with Supabase; wrote database migrations and set up GitHub Actions to run automated quality checks on every change.
- Owned the project end to end: requirements, UI, database design, and delivery to the clients.

SELECTED PROJECTS

Melodix | Flutter, Dart, Python, FastAPI, PostgreSQL

- Built a full-stack music streaming platform: Flutter/Riverpod client and FastAPI/PostgreSQL backend with JWT authentication.
- Implemented background audio playback, playlists, search, artist profiles, file uploads, and cloud media storage.

Discord Clone | Next.js, TypeScript, Prisma, Socket.IO, LiveKit

- Developed a real-time community app with servers, channels, live messaging, voice/video calls, file sharing, and member permissions.
- Integrated LiveKit for voice/video and Socket.IO for real-time messaging, with authentication and role-based access.

WhatsApp | Flutter, Dart, Firebase, Socket.IO, LiveKit, Agora

- Built a cross-platform messaging app with text and voice messages, voice/video calls, media sharing, and live location.
- Used Firebase Authentication, Firestore, and Storage alongside a custom WebSocket chat server.

EDUCATION

Bachelor of Science in Software Engineering

Aug 2025 - Expected 2029

INTEC - Instituto Tecnológico de Santo Domingo
