

Software built around real business workflows.

Custom web applications, mobile apps and internal systems designed to simplify operations.

CAPABILITIES

Web applications

Mobile applications

Scheduling systems

Dashboards

Authentication & roles

Database-backed workflows

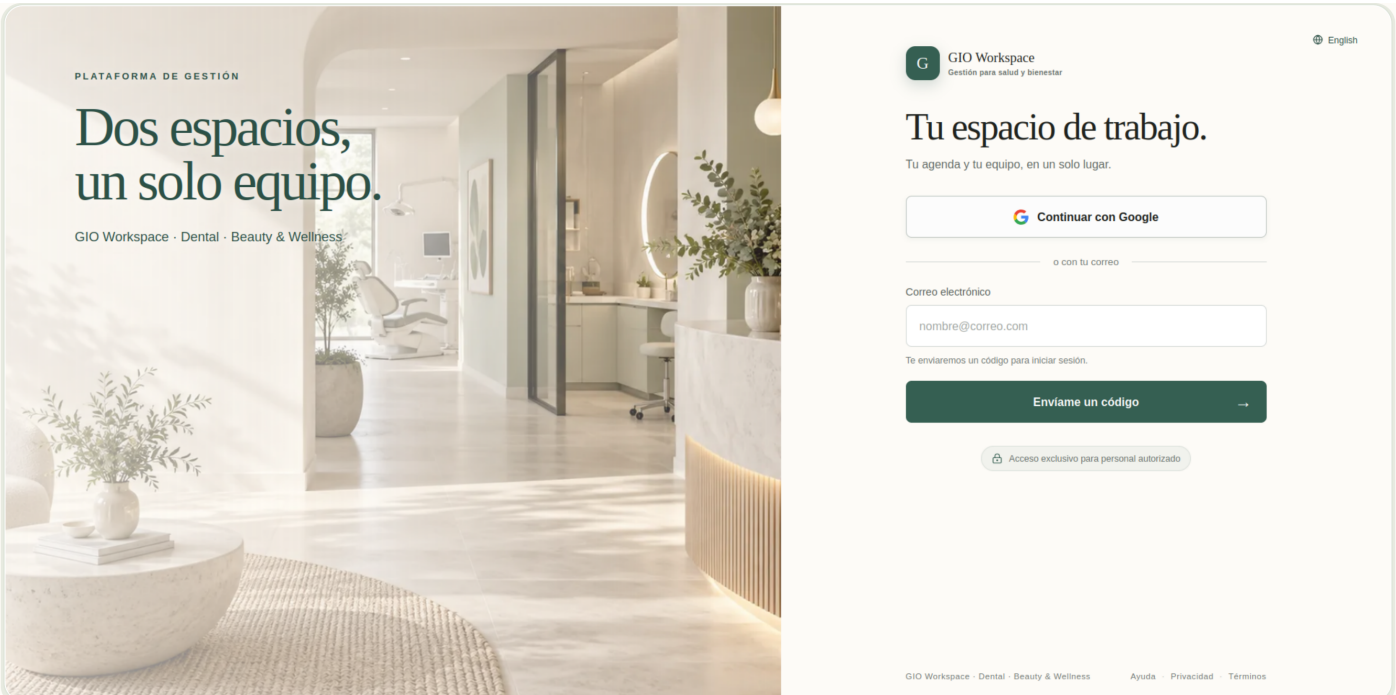

SELECTED CASE STUDY

GIO Workspace

Responsive business-management platform for appointments, services, patients and team access.

TECHNOLOGY

React • TypeScript • Vite • Supabase • PostgreSQL

RESPONSIVE • FULL-STACK

GIO Workspace

A custom web application for beauty, wellness and dental teams.

DESKTOP SIGN-IN

Two business contexts

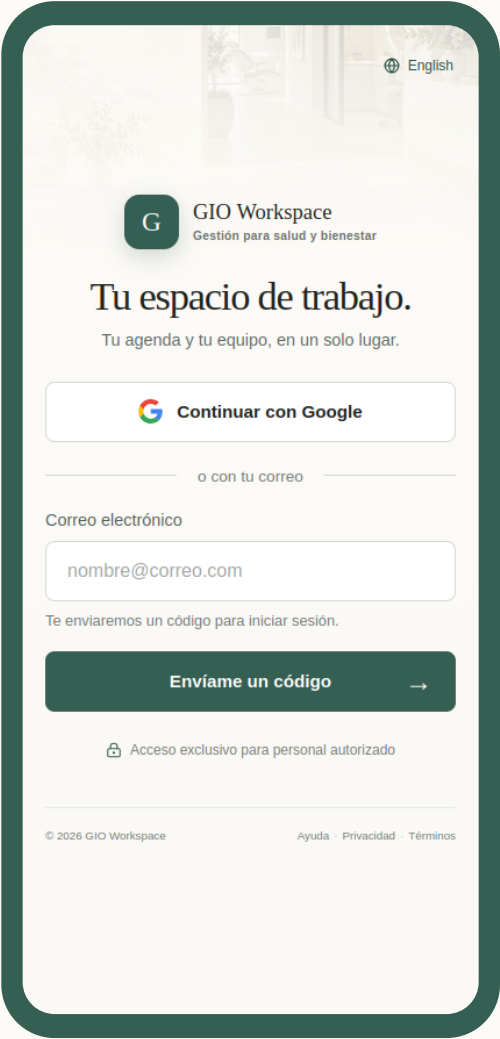

GIO Beauty & Wellness and Giolary Dental in a shared workspace.

Responsive interfaces

Desktop and mobile layouts built around the same business identity.

Full-stack development

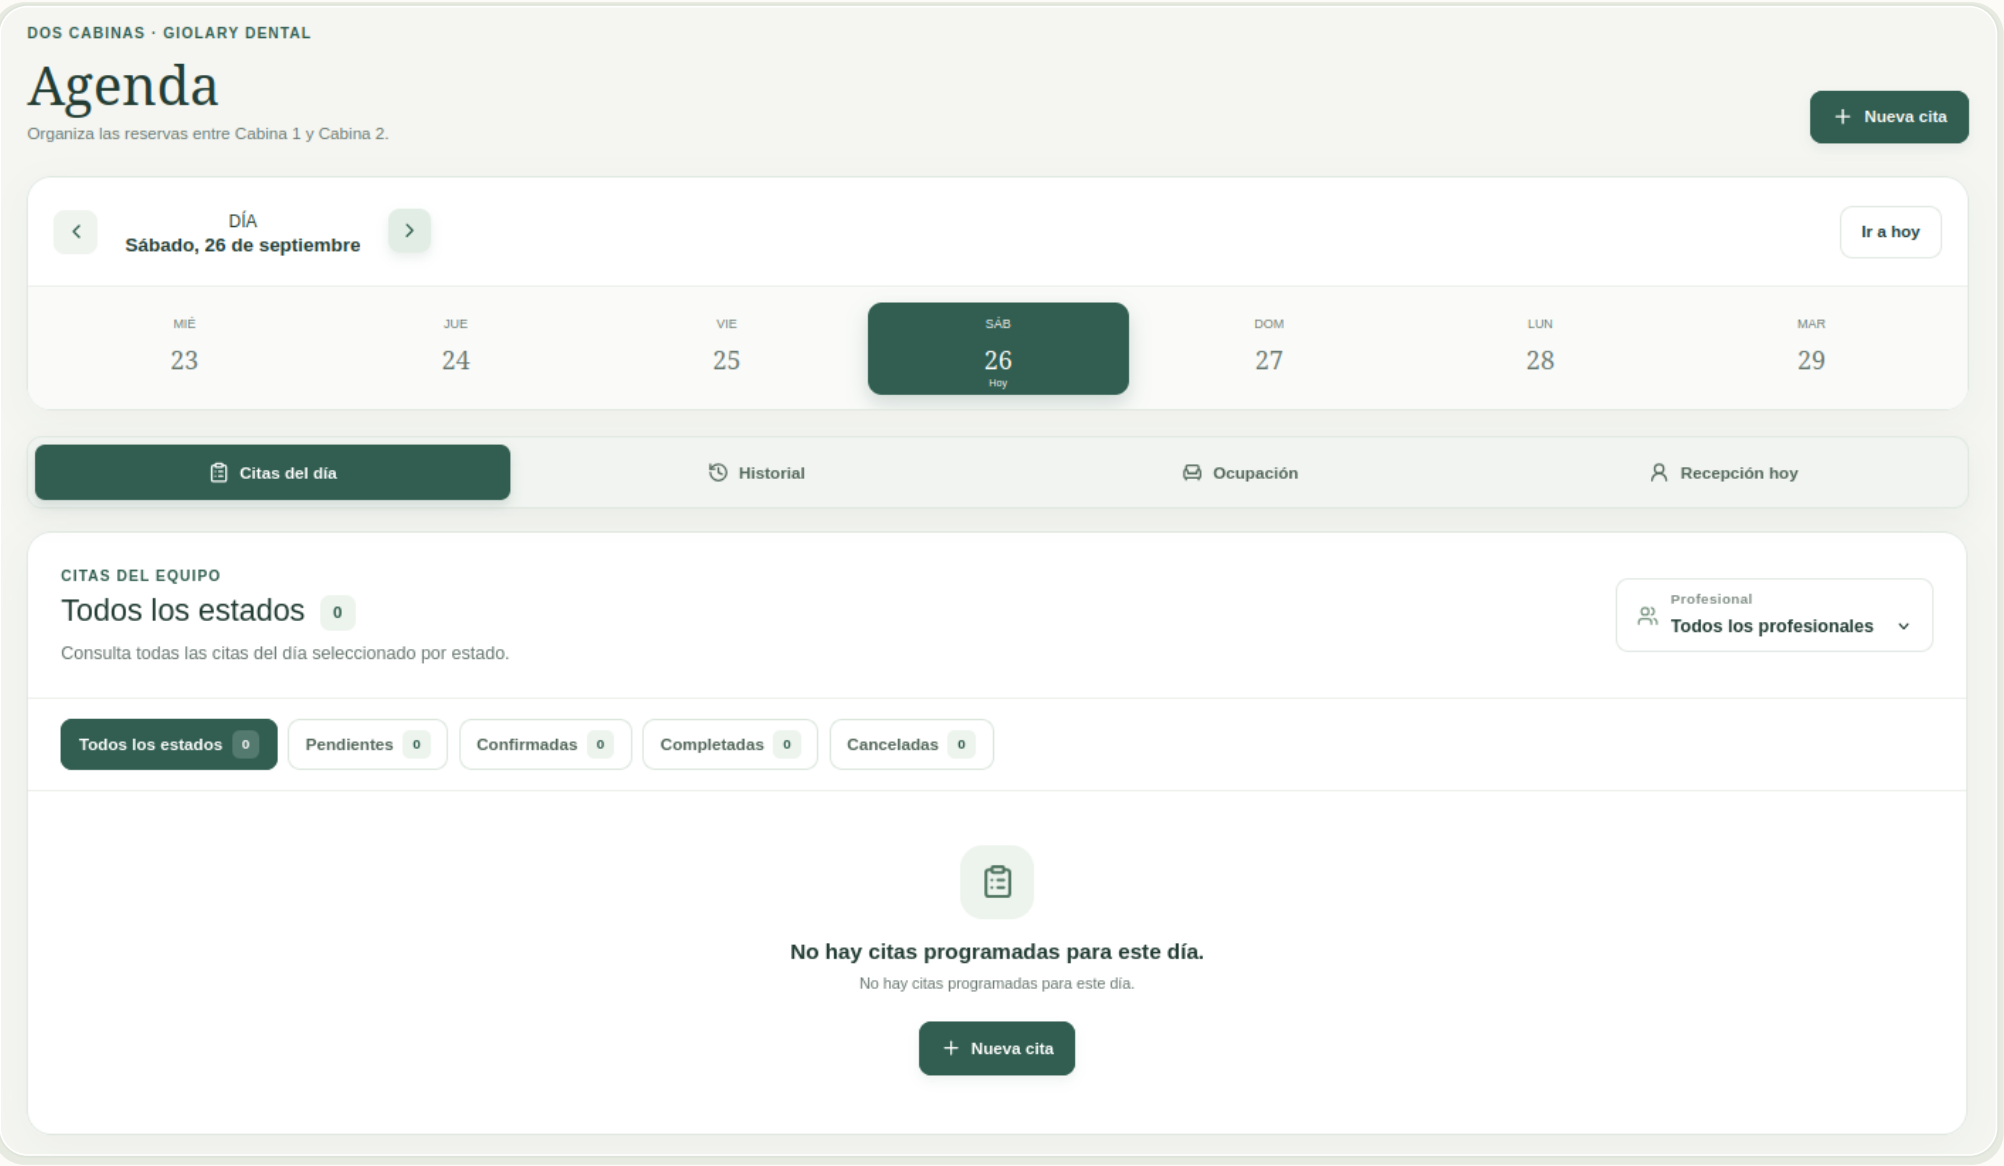

A project focused on access, scheduling and day-to-day team workflows.

MOBILE SIGN-IN

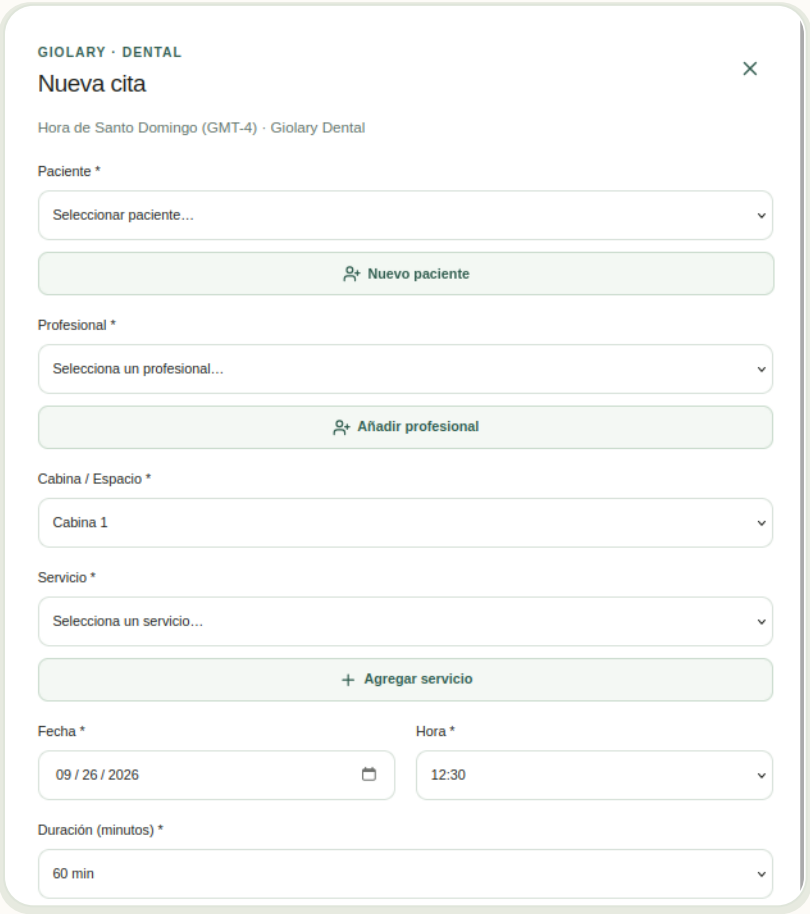

Appointments, organized.

A clear workspace for daily schedules and appointment details.

DAILY SCHEDULE

Browse dates and filter appointments by professional or status. Dedicated views separate the day's schedule, history and room occupancy.

APPOINTMENT FORM / DETAIL

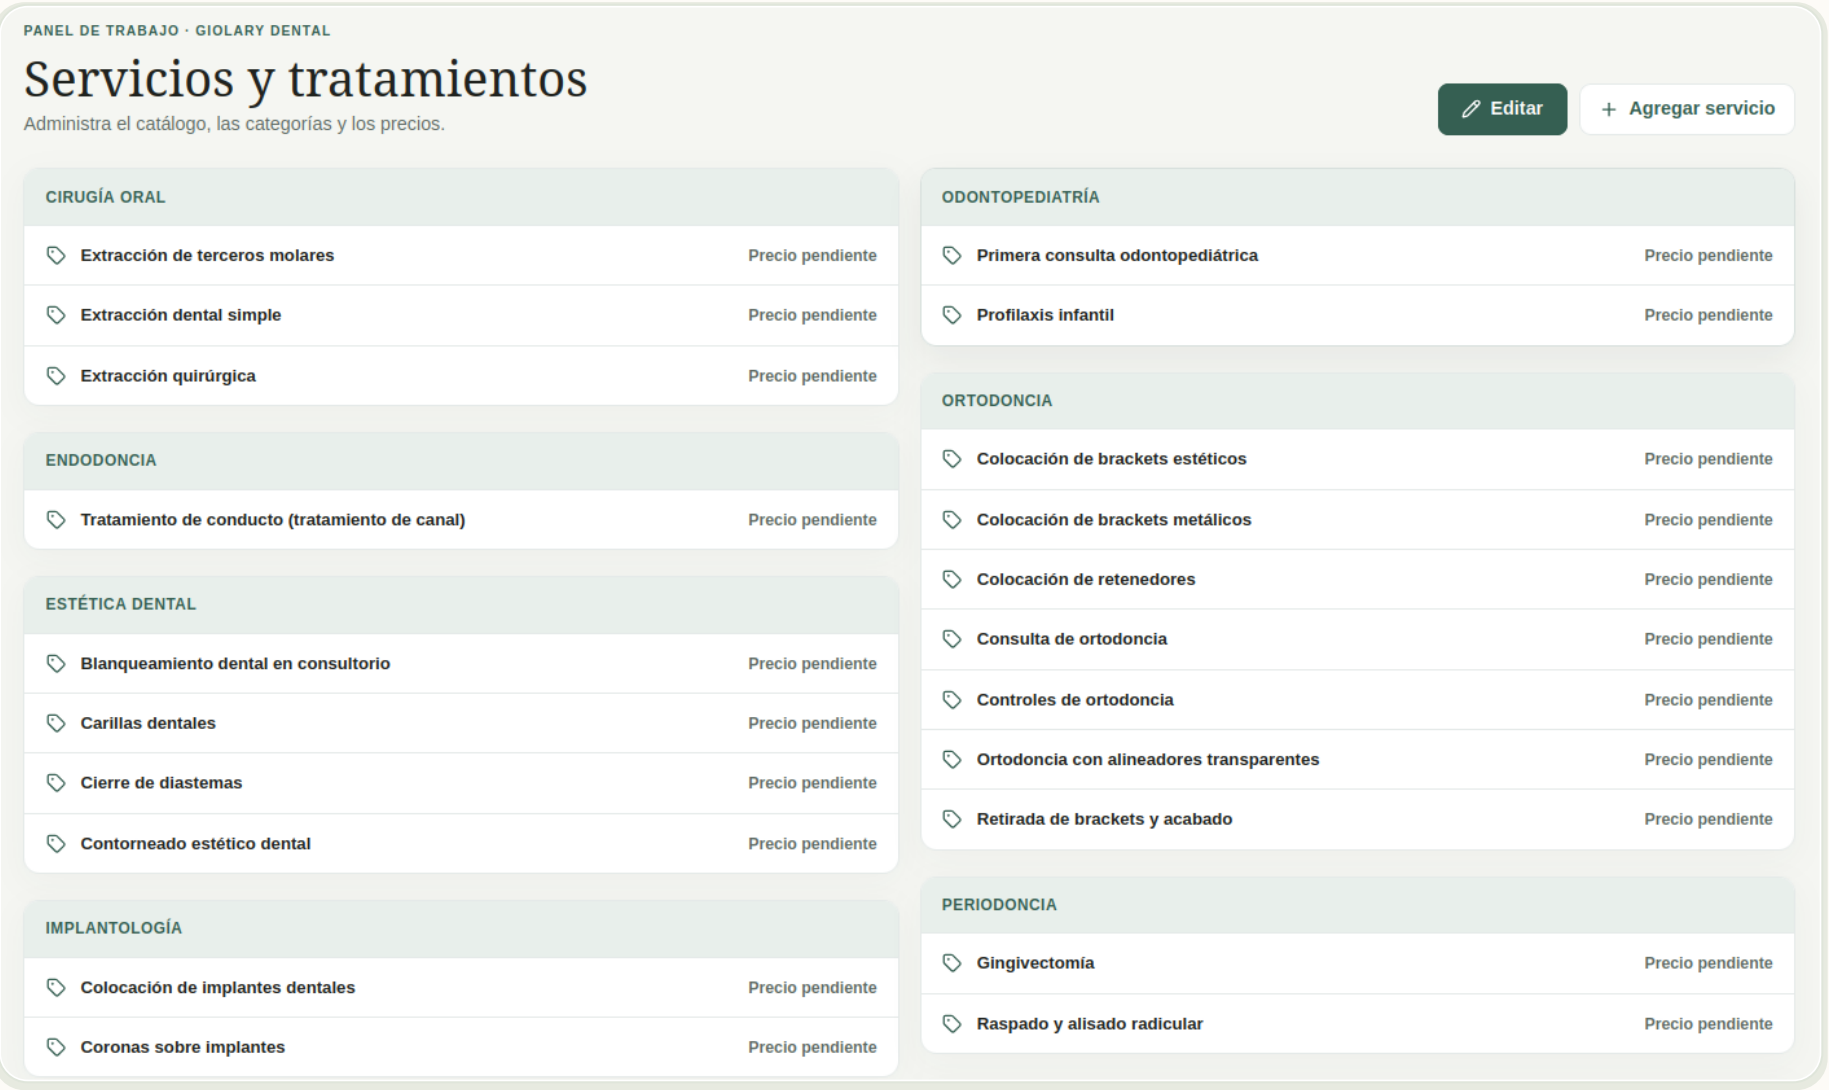

Patient, professional, room, service, date, time and duration, together in one flow.

Built around the team's workflow

Selected view from the application.

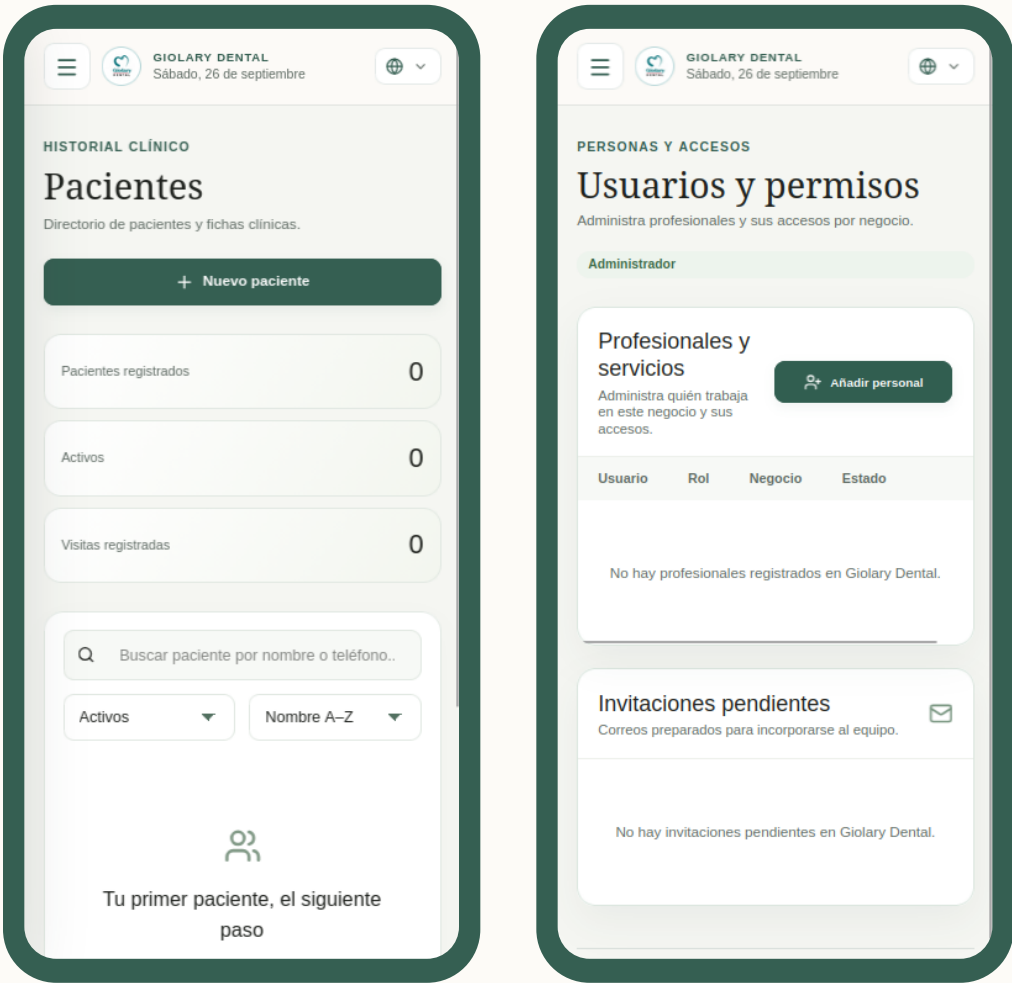

Everyday work, connected.

Services, patient management and team access in a consistent interface.

SERVICES & TREATMENTS

A categorized service catalogue alongside patient and staff management screens.

PATIENT MANAGEMENT

TEAM ACCESS

Custom web development for real business workflows.

Portfolio project. Features and deliverables depend on the scope agreed for each order.
